

MARLON DAVIS' FINDINGS ON THE BLOOD SMEAR AND RIB CAGE

In early 2009 Marlon Davis was featured on a radio program. He stated that he had discovered a long blood smear and an animal rib cage in some frames from the Patterson/Gimlin film. Listeners were showed an image of this finding on their computers. The image Davis presented was as follows:

Please go to the last image in the following sequence. It is marked "X". Now follow the image back and you will see that it is simply logs in the film background.

I sent this information to Davis and he acknowledged receipt.

I did not post this information. However, at this time it appears that some people might be of the opinion that Davis' discovery was correct, and it does not appear Davis took any steps to correct the matter. **DAVIS' BLOOD/RIB CAGE FINDING HAS ABSOLUTELY NO CREDIBILITY.**
